

FCC Director

My name is Woody Woodruff I'm writing in hopes you the FCC will continue to allow XM RADIO to broadcast traffic and weather and etc though the air waves. Not only do I think XM RADIO is the best thing going in music today, but with it's vast number of different floormats we are able to enjoy life as we travel. I find the weather and the traffic to be very very helpful. It's there when I need it and where I can find it. I feel if XM RADIO is allowed to continue with this you will see fewer deaths on the road.

Thanks so very much.. I hope you agree . We need XM .

Sincerely

Woody Woodruff
